

KI 900 Series™

Spacesaver

WORKING
FOR
YOU

The KI 900 Series range has entirely flush fronts made possible by a unique patented slide suspension with a robust integral touch latch mechanism.

The range shares the same shells and many components of the flexible and reliable 700 Series range. Designers will now be able to create runs of cabinets free from recessed pulls, to achieve a crisp monolithic aesthetic, without compromising function and flexibility.

KI 900 Series, is available in 6 standard widths and numerous heights of prefigured units. The new flush lateral drawer fronts will also complement the A4 flush fronted pedestals, end of desk units and numerous other personal storage products available from KI.

The entire range of KI 900 Series cabinets perform to and exceed the highest BS, BS EN and GS/DIN strength and stability performance standards.

Like all of KI's lateral, pedestal and personal storage ranges, the KI 900 Series range is offered in any colour you like at no extra charge. All that is required for colour matching is a RAL reference or a sample to match. To assist in colour selection KI provides an abbreviated RAL-K1 selector with 190 options. Metal paint match samples are provided for approval.
