

Highly space efficient, PivotFile is a cost effective alternative for team filing needs.

PivotFile's double sided rotating cabinets significantly increases storage capacity and can halve the required footprint. PivotFile is ideal for areas where frequent access to information is required.

PivotFile delivers up to 400% more information in the same floor space as traditional drawer files. PivotFile rotary storage is a true multimedia storage environment that is designed to meet a variety of needs. A wide range of accessories allow units to be easily interchanged, and our flexible architecture supports future storage requirements.

Flexibility is one reason PivotFile is so attractive in today's ever-changing business world. PivotFile rotary storage systems are easily expanded with starter units, adder units, and the

PivotFile®

Example configurations:

- Work height.
- Next to or between walls or panels.
- Back-to-back for high density or high access.
- Between workstations in alcoves and free standing as a room divider.

industry leading full adder unit. We have twelve standard heights from 3-tier to 9-tier units. The industry average is six heights and only KI-Spacesaver provides a 9-tier unit. We also have over 200 models and customizable interiors.

A smooth motion means no need for handles as the unit responds to a light push. Spring loaded rollers ensure a secure docking position at each turn. Units can be securely locked in each position. High gloss, powder coated finish in various colours.
