

# McGrigor Donald

McGrigor Donald, one of the UK's leading commercial law firms, has chosen KI's 700 Series Lateral Filing and Storage System for its new Princes Exchange offices in Edinburgh. It had become clear to McGrigor Donald that their previous filing system no longer served their needs. KI's 700 Series provided the solutions, offering flexibility in filing a wide variety of types and sizes of paper – while simultaneously maximising use of space.

Facility Manager Sharron McDonald comments, ' We had chosen to switch to a lateral filing system, and specified KI because they demonstrated the flexibility of 700 Series to suit our needs. We now have a sleek, well organised and flexible filing system.'

KI and local dealer AXIS carried out a detailed filing audit for McGrigor Donald, which ensured that the right filing system could be selected. Predominately low units have been specified to provide sight lines within the open plan offices, while some units are mobile to suit new ways of working.
