

Torsion[®] on the Go!

Incorporating Torsion[®] Seating Family

Torsion on the Go!, designed by the world renowned Giancarlo Piretti, is a revolutionary advance in seating. Destined to become a design classic, the multi-award winning Torsion on the Go! has already achieved recognition with a NeoCon Gold and the prestigious G-mark prize.

Torsion on the Go! is a supremely intelligent approach to the requirements of multi-purpose meeting, training and conference environments. Exceptional comfort is provided by a smooth back articulation created by a unique patented torsion spring mechanism. Coupled with a light design aesthetic, Torsion on the Go!'s unrivalled comfort and practicality make it one of the most specified multi-purpose chairs in the market. The unique oversized articulating tablet arm folds down for efficient nesting.

The tubular steel frame is available in chrome or a variety of durable painted finishes.

Torsion on the Go! is a nesting chair. The flip up seat enables the chairs to be nested for storage, one inside the other, allowing it to be rolled easily in meeting areas or to storage. Torsion on the Go!'s elegant slim design is not only pleasing on the eye, but it's practical too. When nested, quantities of Torsion on the Go! chairs occupy remarkably little space.

An array of features and options make Torsion on the Go! a highly versatile chair. Available with or without arms, a choice of polypropylene or upholstered backrests and special oversized castors - Torsion on the Go! is the do anything, go anywhere chair.

Meetings, conferences and classrooms often require the use of a tablet surface. With Torsion on the Go!, the tablet is a standard option which has been designed for modern working environments.

The tablet accommodates a full size laptop, is large enough for both left and right handed users and is stable and sturdy. For added convenience the tablet partially opens for ease of exit, and effortlessly folds away to the side when not in use.

Torsion on the Go!! is part of the wider Torsion range, which includes 4-leg, stacking, cantilever and fixed base chairs.

KI's Hurry Up! nesting tables are a natural twin for the Torsion range and allow for a perfect multi-purpose conference, training or meeting environment
