

Whittingham Riddell

A progressive storage and filing strategy was a critical aspect of Whittingham Riddell's move to sleek new offices. The successful accountants recognised that thinking about space and time efficiencies in terms of productivity and cost effectiveness is crucial to the firm's continued growth. For its storage and filing Whittingham Riddell chose KI.

With its high quality interiors designed by Grant Thorp, Whittingham Riddell's purpose built offices on the outskirts of Shrewsbury reflect the accountants' professionalism and strong brand. Products, finishes and detailing throughout demonstrate the Whittingham Riddell are serious about quality and abhor waste.

Managing Principal Phil Lane explains the thinking behind the decision to specify KI's 700 Series lateral storage and filing system.

"Accountants generate a lot of paper, must archive documents for a long period by law, and collect a wide variety of media."

"Using the KI system in conjunction with an intelligent software called SingleView we've reduced the number of cabinets we used to have at our old premises by a quarter. It's far more efficient in time and space - and we've cut our stationery costs by £1,000 per month."
